

MSMEC Pole Maps Update – Analysis Overview

Data analysis compiled through: May 5, 2024

Project completion total (entire burn area): **79% Completed**

Analysis Details

Completion rate increased 0.2% from April 15 due to:

- Very slight construction progress in Las Dispensas; area now complete!
- Very slight construction progress in Tierra Monte which also had a few more poles set, and 26 more poles inspected

Calculations/Queries

Poles left to be fixed = Status (*Staked*) AND Construction Needed (*New, Replaced, Retired*)

Poles fixed = Status (*Assessed Good, Inspected, Constructed, Set*)

% Poles fixed =

Poles Fixed (# poles fixed) ÷ Status (*Assessed Good, Staked, Inspected, Constructed, Set*)

DATA DICTIONARY/DEFINITIONS

STATUS:

In the Fire Zone = Poles were selected based on the Fire boundary

Assessed = Surveyors went out and Assessed if the poles were good or bad

Assessed Good = Stakers assessed the poles and they were good

Staked = The Poles were designed and are waiting to be constructed

Pole Set = Contractors Set the pole but haven't strung the wire

Constructed = The contractor set the pole with all the assemblies and wire on it

Inspected = Nathan or Rick or someone from T&D inspected the contractor's work

CONSTRUCTION NEEDED:

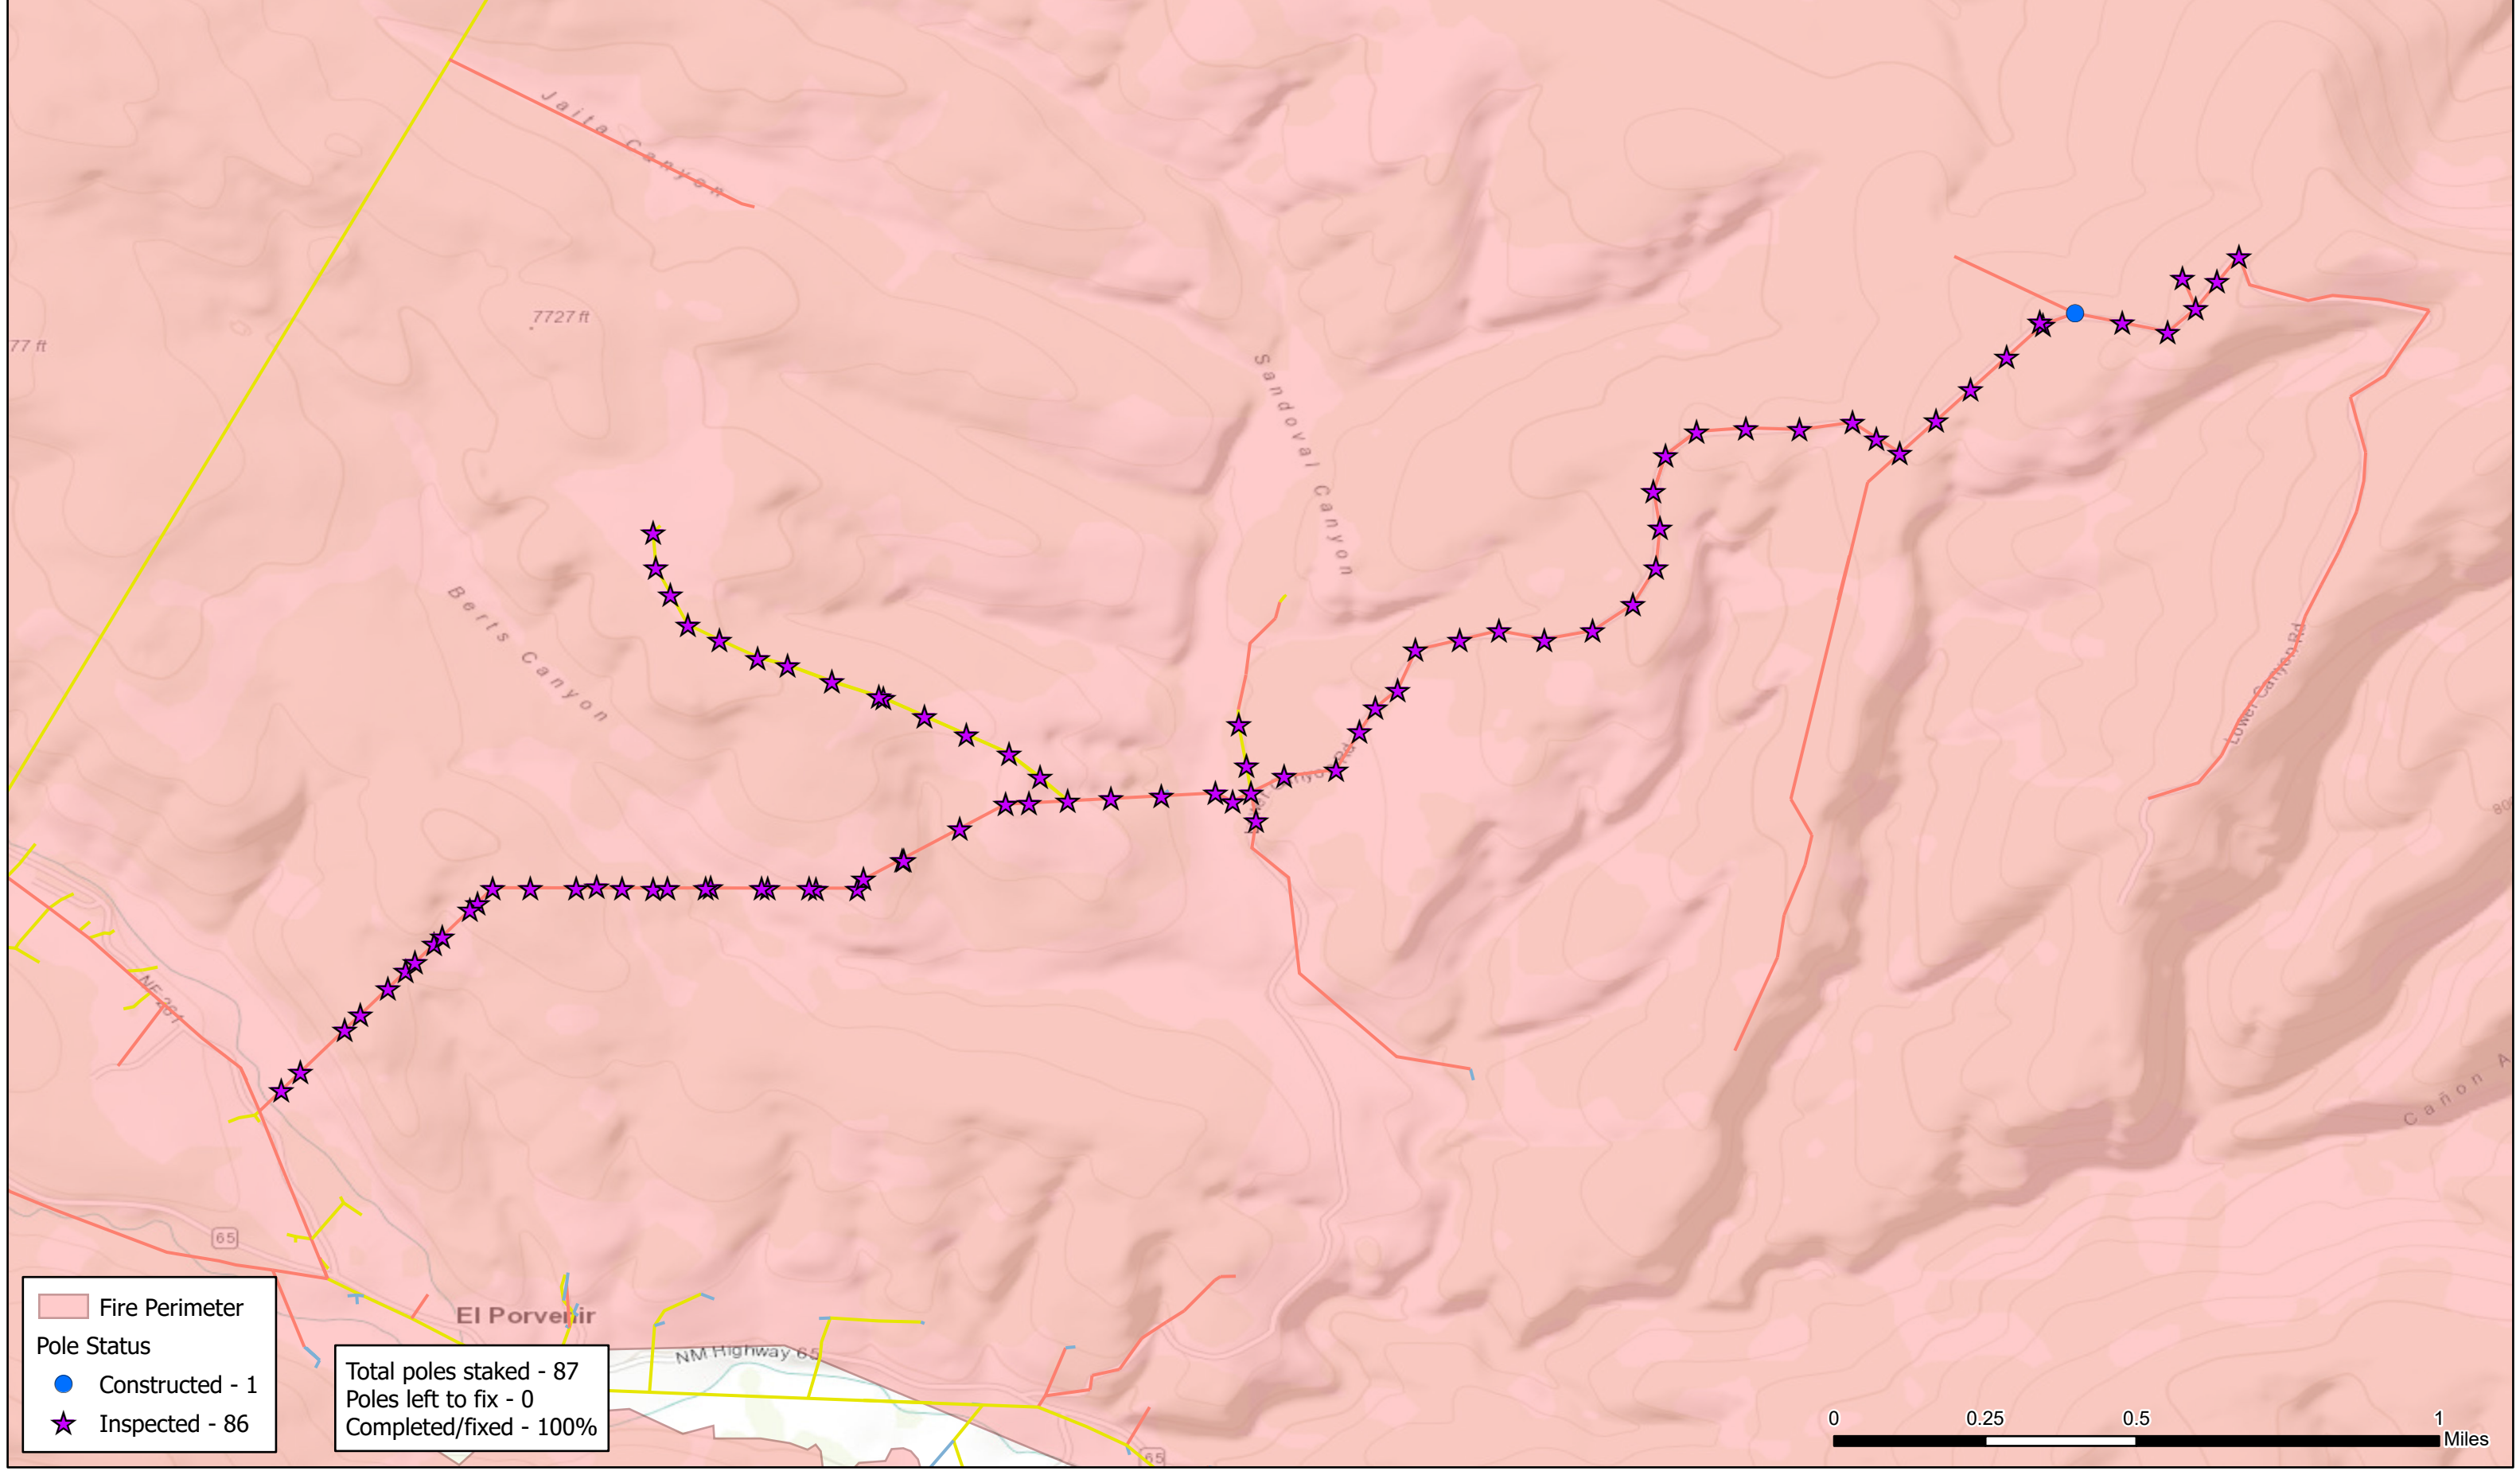

New = New poles & assemblies in a new spot

Replaced = Replace the existing pole and assemblies where existing pole is located

Retired = Remove pole completely (and do NOT replace)
